1920

# The Hospital for Sick Children.

## CONSULTING STAFF

### Physicians

Dr. Allen Baines  
Dr. A. H. McPhedran  
Dr. H. T. Machell  
Dr. W. B. Thistle  
Dr. J. T. Fotheringham  
Dr. W. Goldie

### Surgeons

Mr. I. H. Cameron  
Dr. A. Primrose  
Dr. B. Z. Milner  
Dr. F. N. G. Starr  
Dr. C. Shuttleworth

## THE ACTIVE STAFF

### Physicians

Dr. Alan Brown  
Physician-in-Chief  
Dr. Alan Canfield  
Dr. George Boyer  
Dr. Beverley Hannah

### Surgeons

Dr. Clarence L. Starr  
Surgeon-in-Chief  
Dr. W. E. Gallie  
Dr. D. E. Robertson  
Dr. L. Bruce Robertson  
Dr. A. B. LeMesurier  
Dr. R. I. Harris

## ASSOCIATE PHYSICIANS

Dr. George Smith  
Dr. Edward Morgan

Dr. George Pirie

## CLINICAL ASSISTANT PHYSICIANS

Dr. Arthur Goulding  
Dr. Frank Park  
Dr. Frank Hassard  
Dr. H. A. Dixon  
(In charge Dermatology)

Dr. A. A. Halliday  
Dr. W. G. MacKchnie  
Dr. J. N. McKinley  
Dr. C. E. Hill

### Eye Service

Consultant—  
Dr. James MacCallum  
Active Staff—  
Dr. W. H. Lowry  
Dr. G. H. McLaren  
Dr. W. W. Wright

### SPECIALISTS

Ear, Nose, Throat  
Consultant—  
Dr. Geoffrey Boyd  
Active Staff—  
Dr. E. Boyd  
Dr. G. Royce  
Dr. C. W. L. Clark

## ANAESTHETIST

Dr. C. H. Robson  
Assistant—Dr. H. J. Shields

Angelia M. Courtney, B.A., Radcliffe College (Harvard University)  
Director Chemical Research Laboratories

Ida F. McLachlan, B.A., Toronto, Assistant Director

Dr. Gladys Boyd, Fellow in Pediatrics

Dr. I. H. Erb, Director Pathological and Bacteriological Laboratories

## TUBERCULOSIS CLINIC

Chief—Dr. Harold Parsons  
Assistants—Dr. F. S. Minns, Dr. J. H. Elliott

### Dentist

Dr. J. A. Bothwell

### Radiologist

Dr. A. H. Rolph

## REGISTRARS

Medical  
Dr. Frank S. Park

Surgical  
Dr. A. B. LeMesurier

## RESIDENT HOUSE STAFF

Dr. R. Simpson  
Resident House Physician  
Dr. V. Dowler  
Dr. F. Boone  
Dr. W. H. Holmes  
Dr. H. S. Little

Dr. Robert Janes  
Resident House Surgeon  
Dr. H. G. Young  
Dr. P. A. Sargent  
Dr. D. M. Masson  
Dr. A. L. Huether

Dr. S. Graham  
Resident Pathologist

Dr. E. G. Wheeler  
Resident Pathologist

Dr. H. I. Palmer

### FORTY - FIFTH ANNUAL REPORT

---

In this Forty-fifth Annual Report of the Hospital for Sick Children is a record of service which surpasses that of any previous year. The Trustees hope that its claims will make a stronger appeal to the child-loving people of the Province than ever before to carry on the good work, and urgent plea is made to the liberality of its friends.

Prices of almost all supplies reached their peak during the period covered by this report. It is evidence of economical management that the increase in the daily cost of caring for each cot patient was only seven cents more than in 1919. But, before the downward trend in prices began, the overdraft was \$143,042 on maintenance account. In addition, the Hospital had to purchase outside accommodation for a part of the personnel, so great has become the pressure upon the available space in the Main Building. Because of improvements and renovations, the capital outlay exceeded \$50,000. Thus the Hospital's burden of debt is far greater than ever in the past. It is hoped that the record of service will encourage the friends of the Mother Charity to further evidence of their sympathy.

#### A GLANCE AT THE PAST 12 MONTHS WORK.

From the 1st of October, 1919, to the 30th of September, 1920, the total number of in-patients admitted was 4,983. Of these 2,232 were girls and 2,751 boys; 1,787 were medical cases and 3,196 surgical.

The largest number of in-patients treated in any one day was 309; the smallest, 179; and the daily average, 239.

Of the total 4,983 in-patients, 930 were admitted from 289 places outside of Toronto. In 1919 there were 760 from 271 places.

The total number of out-patient attendances was 40,934. Of these 18,400 were girls and 22,534 boys.

The largest number of out-patients treated in any one day was 220; the smallest 85; and the daily average 132.

The total number of surgical operations performed in 1920 was 5,228, a decrease of 29 from the previous year; in the in-patient department 2,974, and in the out-patient 2,254, where also many minor operations were performed which are not tabulated.

#### SEVENTEEN DAYS IS AVERAGE STAY.

The total number of days' treatment for 1920 for the 4,983 in-patients was 84,902. The average days' stay of each patient was 17. The previous year the total number of days of Hospital care was 79,461, almost 5,000 less.

This average days' stay is found by dividing the total number of in-patients, 4,983, into the total days' stay, 84,902, of all patients in the Hospital for the year.

#### RECORD NUMBER OF PATIENTS.

The tabulated returns show the work accomplished in all the departments. The total number of patients treated was 4,983 in the wards, and 40,934 in the out-patient clinics, a total of 45,917—a record in the history of the Hospital.

#### BEQUESTS IN THE YEAR 1919-1920.

The Trustees acknowledge, with thanks, bequests from the estates of: Henry James, Brantford, \$250; Henry Murdock Campbell, \$500; William Wood, Toronto, \$1,666.66; Mrs. Rumple, Kitchener, \$100; Thomas R. White, Almonte, \$500; Mrs. Amanda Brown Horsman, Township of Nissouri, \$1,000; William Warren, Montreal, \$265; W. D. Matthews, Toronto, \$5,000; Wm. Jos. Roberts, Brantford, \$100; Thos. Rodway, London, \$1,000; Wm. Ramsay, Bowland, Scotland, \$300; W. P. Innes, Simcoe, \$100; Jermyn and J. Edgeworth, Toronto, \$1,313.75; John Richardson, Toronto, \$100; Maria Gill, Exeter, \$200; John T. Small, Toronto, \$1,000; Wm. Logan, Toronto, \$7.00; Dr. Jas. Moon Salmon, Simcoe, \$2,000; Thos. Battye, Toronto, \$200; Miss A. M. Rice, Caledonia, \$108.96; D. W. Glass, Toronto, \$500; Catherine L. Featherstonhaugh, Toronto, \$100; Estate J. Ross Robertson, Toronto, \$10,000; Mrs. Ellen Peterson, Simcoe, \$50; Allan G. Scilly, Welland Junction, \$250; Jacob Doyle, Toronto, \$500; Charles Morris, Toronto, \$500; Mary McPherson, Cornwall, \$1,000; Geo. H. Clare, Tweed, \$500; Estate of Mary Blunt, Barrie, \$444.35; Elizabeth Lyons, Brampton, \$405.05; Richard Brown, Toronto, \$500; Henry F. Fearman, Onandaga, \$100; Alex. Patterson, Toronto, \$500; R. R. Newborn, New Toronto, \$19.40; Mrs. Lois Kerr, Meaford, \$100; D. Clark, Toronto, \$120; Henry Woods, Aylmer, \$77.30; Mrs. Mary Berinyer, Picton, \$500; W. D. Lummis, Brampton, \$100; Sophia Hyman, Brampton, \$475; Jas. McClinchy, Toronto, \$250; Jas. T. Mathews, Toronto, \$1,000; Jean King, Owen Sound, \$50; Mrs. S. J. Stratford, Brampton, \$29.72; Lieut. C. P. Waldie, Toronto, \$21.00. Total—\$35,803.19.

**CHEMICAL RESEARCH LABORATORY.**

The Hospital has been indeed fortunate in securing the services of Miss A. M. Courtney, B.A., of Radcliffe College (Harvard University), to take charge of the Chemical Research Laboratories. This is a vitally important factor in solving the manifold problems of child nutrition. It may be apropos to record that, since the creation of a special Babies' Department, the infant mortality in Toronto has decreased from 151 to 88 per thousand, and that the methods which made this possible have been generally adopted throughout the province.

The Trustees desire to express their gratitude to Sir Joseph Flavelle for his generosity in equipping this laboratory, and also for the compliment to the institution in proving that he believed that the best was none too good for it.

**LARGER THEATRE FOR LECTURES.**

The John D. Rockefeller donation to the University of Toronto for development of its medical school is an event of vast importance. It marks the City of Toronto as one of the continent's great centres of medical instruction. The Hospital for Sick Children is admittedly one of the greatest institutions of its kind in the world and, in order that in every way the whole province may derive full advantage from the work it accomplishes, it has amplified the unexcelled facilities it has always extended to the doctors of the future. The capacity of the lecture room has been greatly increased, while the daily clinics are more than ever thronged with students eager to learn the last word in pediatric science.

**A COMPREHENSIVE LIBRARY.**

In this connection, mention may be made of the friend who anonymously provided the Hospital with an up-to-date library representative of all the world's greatest authorities on children's diseases, and subscribing to all the periodical literature of value to the pediatrician.

**X-RAY DEPARTMENT.**

The X-Ray Department donated by the employees of the T. Eaton Company is now complete. Not only are medical problems solved by the fluoroscope, but the surgeons have also found advantage in performing many minor operations in immediate collaboration with Dr. A. H. Rolph, the Raentgendogist. Special provision is made for both minors and adults who are not patients of the Hospital. The excellence of the work done is an even greater recommendation than the reasonableness of the charges.

**PSYCHIATRIC CLINIC.**

The Hospital has extended the scope of its work to include not only sick and crippled children but also those who are mentally sub-normal. A great percentage of these cases submit readily to treatment if taken soon

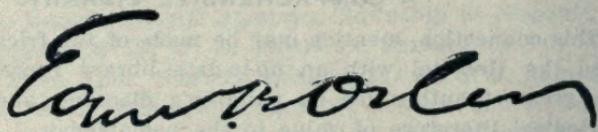

enough in hand. Here, again, the Hospital is under obligation to one of its friends, who has provided premises for a clinic and the funds necessary to maintain it for a term of years. Here eminent psychiatrists will determine whether an affliction is organic or merely functional, and for children in the latter class will be prescribed such psycho-therapeutic treatment as seems best suited to build good citizenry out of what, till very recently, was too often regarded as hopeless material.

**ONLY ONE APPEAL MADE.**

The Province of Ontario owes it to its pride to maintain what is admittedly the foremost Children's Hospital on this continent. The public owe it to the future citizens of Ontario to retain for their service an institution which places no limitation on what it is eager to do for their physical and mental well-being.

All this requires money. It is well to point out that the Hospital for Sick Children participates in no joint appeals. Because of its half-century of work for sick and suffering children it is the "pet charity" of thousands. Whether they forward generous cheques at Christmas time or drop not-easily-spared pennies into the contribution boxes, the Trustees are as proud of the sympathy thereby revealed as they are grateful for the support thus provided.

For the Trust—

Chairman

SIR E. B. OSLER,  
STRACHAN JOHNSTON,  
ROBERT F. SCOTT,  
IRVING E. ROBERTSON,  
DOUGLAS S. ROBERTSON,  
S. G. CURRY,  
H. H. WILLIAMS,  
HON. JUSTICE W. N. FERGUSON,  
SIR JAMES W. WOODS.

TRUSTEES.

## Cots Named in Perpetuity by Payment of \$2,000

Name of Cot.	Est'd	By Whom Established.

DAILY SUN BATH ON VERANDAH

## Summer Scenes at Island Annex

ACH season as many as possible of the sick children are removed to their summer home. They are accompanied by nurses and staff of physicians, and in this cool, refreshing atmosphere during the sultry summer days they gain new health and enter into the games and revels of happy childhood. The Lakeside Home is opened for their reception on June 1st, and remains open up to Sept. 15th. Although there is a large exodus of children during the summer, no decrease is shown in the number of cots occupied in the Main Hospital. Obviously, as soon as one little patient leaves another is ready to fill its place. The Hospital launch serves the purpose of transferring the children as necessity requires. There are three pavilions where the little ones are cared for, namely: Boys' Surgical, Girls' Medical and Tubercular.

There are 8 nurses in constant attendance, while the cooks, ward maids and nursery maids reach 18 in number. There is also a day and night supervisor, who is a qualified graduate nurse. It may be well to mention here that in addition to the three pavilions for the little patients there are also the Nurses' Pavilion, Doctors' Apartments, Day and Night Supervisors' Residence, and separate quarters for maids and domestic help.

The approximate cost per month to maintain the Lakeside Home for the 3 1/2 months each season is \$5,000.

**A**DECIDED advantage is afforded by the Cubicle System adopted by the Hospital over the older methods of treatment for infant diseases. There are twenty-four of these cubicles, each of glass construction, equipped with hot and cold water—separate heating and ventilating, thus giving perfect isolation to the infant with consequent immunity from contagion. The smaller cubicles accommodate two or three infants, and larger

ones six to eight. During the past year 893 babies were treated, the ages ranging from 1 hour to 18 months old. In connection with the cubicles there is also the milk modification laboratory, where the various formulas are made up. Many

different modifications of used, each infant receiving a tion of the fat, sugar and pro insure full benefits after dis charge, a graduate nurse is sent to the home to follow up the case with parents and see that prescribed treat ment is carefully carried out.

The Nutritional Clinic recently added to the outpatient work of the hospital fills a long-felt want. Daily Clinics are held, where

As a result of work  
1 departments offi-  
as prove that dur-  
ast six years the  
among infants in  
lone has been re-

duced from 155 to 85 per thousand. In thus helping to reduce the death rate and by prolonging the useful working life of the individual, the Hospital fills its province-wide mission and promotes the well-being and happiness of the community.

The efficient methods which have made this possible are being adopted by every progressive practitioner. In this connection a very important work is accomplished through

keeping a vast number of children out of the hospital, and thus leaving this institution in a better position to take care of the hundreds of poor children sent here upon the order of municipalities. For 1920 there were just 930 patients admitted from 289

towns and villages in Ontario, in addition to the 4,053 from the City of Toronto. Statutory grants made by municipalities do not meet the actual cost of maintenance of these patients. It is to be noted that free inpatients and public charges, all of whom are unable to pay, get more days of treatment in proportion to their numbers than do the patients who can pay. To keep the Hospital's income adequate for the rapidly mounting expenses there must be a corresponding increase in benefactions from the public if its mission of mercy is to continue each minute of the year.

AUDITORS' REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust, Hospital for Sick Children:—Dear Sir,—We beg to certify that the Receipts and Expenditures of the Hospital for Sick Children have been carefully audited, with the books, vouchers and bank account throughout the year ending September 30th, 1920, and we have verified the securities, and the accompanying statement of Receipts and Expenditures and Assets and Liabilities, bearing our signature, are a true and correct account of the affairs of the Hospital to that date. Respectfully submitted, A. C. NEFF & CO., Chartered Accountants.

In The Hospital—\$2,000 Names a Cot Forever.  
\$100 Names a Cot Year by Year.

In Lakeside Home—\$500 Names a Cot Forever.  
\$25 Names a Cot Year by Year.

**Remember the Sick Children in Your Will**

Read the names of those who have memorial cots. \$2,000 names a cot in perpetuity. If you cannot find a cot, leave something—if only a hundred dollars—to help to nurse sick little ones. The form to use is:—"I Give, Devise and Bequeath to The Hospital for Sick Children, Toronto," the sum of .....

Malunion or non-union of bone			1		Congenital deformity of fingers			1	
Brodie's abscess	1	2	1		Amputation stump (upper extremity)	1			
Scurvy	1	2			Volkmann's ischaemic contracture		2	1	
Epiphysitis (multiple)			i		Congenital deformity of toes	1			
Fracture of femur	33	11	1		Flat or weak foot	1			
Osteomyelitis of femur	4	5		2	Hallux valgus		1		
Epiphysitis of femur		4			Pes cavus	1	4		
Coxa vara			i		Talipes valgus paralytic	1	2		
Coxa valga			1		Talipes calcaneo-cavus, paralytic		2		
Fracture of tibia and fibula	7	3	1		Talipes calcaneo-valgus, paralytic	4	2	1	
Fracture of tibia	6	5			Talipes equinus	2	10	1	
Osteomyelitis of tibia	2	15	2		Talipes equino-varus, paralytic	6	22	3	
Fracture of fibula	1				Giantism of foot	1			
Osteomyelitis of fibula		2	i		Genu varum		2		
Fracture of tarsus	1				Genu valgum	2	4		
Osteomyelitis of tarsus		2			Amputation stump (lower extremity)		1		
Tuberculosis of tarsus	1				Volkmann's ischaemic contracture		1		
Periostitis of tarsus	1				Scoliosis, congenital		1		
Fracture of pelvis	3				Scoliosis, acquired		2	3	
Fracture of clavicle	2	1	i		Torticollis, congenital	2			
Fracture of humerus	18	7			Torticollis, acquired		1		
Osteomyelitis of humerus	2	5		i	Cervical rib	1		1	
Epiphysitis of humerus	1				<b>Ear, Nose and Throat</b>				
Separation of epiphysis of humerus	2	1			Otitis media (acute)	16	26	1	1
Fracture of radius and ulna	4	2			Otitis media (chronic)	2	4		
Fracture of radius	1				Mastoiditis (acute)	51	27	2	3
Osteomyelitis of radius		1			Mastoiditis (chronic)	4	9	2	
Osteomyelitis of metacarpus and phalanges	1	2			Post aural sinus	1	6		2
Tuberculous dactylitis		2			Thrombosis lateral sinus	1			
Fracture of skull	14	8	4	7	Foreign body in larynx	1			
Osteomyelitis of malar bone		1			Scarring of oesophagus		3	1	
Fracture of superior maxilla		1			Stricture of oesophagus	1	3	1	1
Alveolar abscess	3	3			Foreign body in oesophagus	8			
Fracture of inferior maxilla	2				Habit spasm of pharynx				
Osteomyelitis of inferior maxilla	1	3			Acute naso-pharyngitis		1		
Pott's disease, cervical	1				Retro-pharyngeal abscess	3	1		
Pott's disease, dorsal	3	9	3		Fracture of nose	3	1		
Pott's disease, lumbar		4	1	i	Polypus of nose	1			
Fracture of ribs					Congenital narrowing of post nares			1	
Arthritis of ankle (non-suppurative)	1				Epistaxis		1		
Arthritis of ankle (suppurative)	1				Rhinitis		1		
Arthritis of ankle (tuberculous)		1			Deflected septum	7	4	2	
Synovitis of knee		2			Abscess in nasal septum	1			
Foreign body in knee	1				Hypertrophied turbinates	2	1		
Arthritis of knee (non-suppurative)		2			Tonsillitis	4	3	1	
Arthritis of knee (suppurative)	1				Adenoids	57	1		
Arthritis of knee (tuberculous)	3	4			Tonsils and adenoids	1713	6		i
Ankylosis of knee		6	3	1	Weakness following removal of tonsils	10	4		
Baker's cyst	1	1			Oedema of glottis		1		
Congenital dislocation of hip	3	23			Sinusitis, Antrum of Highmore		1		
Traumatic dislocation of hip	1				Ethmoidal sinus		2		
Arthritis of hip (non-suppurative)	2	1			Cervical adenitis		1	3	
Arthritis of hip (tuberculous)	3	12	2	1					
Ankylosis of hip joint		1							
Perthes' disease		6	i						
Flexion deformity of hip		2							
Arthritis of elbow (non-suppurative)	1								

## SURGICAL OPERATIONS.

Table Showing Nature of Surgical Operations from Oct. 1st, 1919, to Sept. 30th, 1920.

Operations	Total	Operations	Total
Removal of glands in neck	6	Reduction of congenital dislocation of hip	19
Drainage of cervical glands	2	Reduction of pathological dislocation of hip	1
Amputation of fingers	2	Reduction of fractured pelvis	1
Amputation of foot	2	Reduction of fracture of clavicle	1
Amputation of thigh	1	Reduction of fracture of humerus	22
Amputation of leg	4	Reduction of fracture of humerus (open)	6
Amputation of toe	1	Reduction of fracture of radius	2
Trimming of amputation stump	2	Reduction of fracture of radius (open)	1
Arthrodesis	12	Reduction of fracture of radius and ulna	2
Arthrotomy mandibular joint	1	Reduction of fracture of radius and ulna (open)	3
Arthrotomy of ankle	2	Reduction of fracture of tibia and fibula	8
Circumcision	2	Reduction of fracture of tibia and fibula (open)	2
Hypospadias	4	Reduction of fracture of tibia	6
Prolapse of rectum (reduction)	2	Reduction of fracture of tibia (open)	1
Recto-vaginal fistula	3	Repair of separated epiphysis	1
Anal fistula	1	Repair of wounds	3
Undescended testes	2	Repair of bone graft	1
Curetttement (abscess)	3	Repair of cleft palate	32
Curetttement (bones)	3	Repair of hair lip	24
Decompression (trephining)	8	Resection of rib	27
Urethral dilation	1	Siphon drainage	1
Astragalus excision	5	Intercostal drainage	1
Excision of knee joint	1	Incision and drainage	2
Excision of scar	1	Fasciotomy	10
Removal of naevus	1	Tenotomy	19
Removal of tooth	1	Tendon fixation	17
Removal of Baker's cyst	2	Tendon transplantation	13
Removal of thyroglossal cyst	4	Tendon lengthening	28
Removal of ganglion cyst	2	Sequestrectomy	24
Removal of ovarian cyst	1	Division of shortened muscles	1
Removal of brain tumor	1	Skin grafting	6
Removal of fibroma of nose	1	Transfusion	246
Removal of rib	1	Aspiration (ankle)	2
Removal of foreign body	1	Cleaning and suturing wounds	4
Excision of head of metatarsal	1	Estlander's operation	1
Removal of meningocele	6	<b>Eye, Ear, Nose and Throat</b>	
Removal of lipoma	1	Shifting cataract	1
Incision of abscess	44	Enucleation	1
Incision of tuberculous abscess	3	Freeing iris from cornea	2
Incision of tuberculous hip	8	Needling of cataract	6
Arthritis	9	Resection and tenotomy of rectus	36
Osteomyelitis	1	Iridectomy	6
Tenosynovitis	1	Skin graft	3
Appendectomy	66	Advancement of externus rectus tendon	2
Appendiceal abscess	5	Suturing torn lids	1
Intussusception	12	Suturing wound of eye	1
Pyloric stenosis	10	Excision of lacrimal sac	1
Enterostomy	2	Dilation of sacs	1
Resection of bowel	1	Removal of tissue from laceration	1
Splenectomy	3	Disintegration of lens	1
Laparotomy	20	Exploration of lateral sinus	1
Peritonitis	1	submucous resection of nasal septum	9
Manipulation of feet	43	Mastoid (simple)	75
Osteotomy, femur	4	Mastoid (radical)	5
Osteotomy, cuneiform	1	Curretting old mastoid	3
Soultar's operation	1	Adenoids (removal)	3
Osteotomy, sub-trochanteric	2	Tonsils and adenoids (removal)	1718
Osteotomy, figula	1	Trimming of turbinates	3
Osteotomy, tibia	4	Incision of post auricular abscess	9
Osteotomy, phalanx	1	Incision of septal abscess	1
Plating fracture	7	Dilatation of stricture of oesophagus	13
Plaster wedge extension	2	Removal of foreign body in oesophagus	8
Obliteration of cavity	1	Removal of foreign body in larynx	1
Plaster cast	7	Reduction of fracture of nose	3
Albee bone graft	10	Elevation of cartilage	1
Torticollis	1	Incision of retro-pharyngeal abscess	4
Plastic operation, webbed elbows	1	Removal of polypus	3
Plastic operation, webbed fingers	2	Paracentesis	1
Herniotomy (inguinal)	81		
Herniotomy (umbilical)	1		
Hydrocele	2		
Reduction of fracture of jaw	1		
Reduction of fracture of femur	41		
Reduction of fracture of femur (open)	2	Total	2974

## MEDICAL REPORT.

Analysis of Diseases with Results—In-patients treated Oct. 1, 1919, to Sept. 30, 1920.

It is to be observed that many patients were suffering from more than one disease.

Disease—	Cured.	Imp'v'd.	Unim- proved.	Died.	Disease—	Cured.	Imp'v'd.	Unim- proved.	Died.
<b>Congenital Malformation</b>					<b>Streptococcus non-haemolit-</b>				
Mouth	14	16	1		ticus		3	1	
Intestine	5	3			Pneumococcus		1	1	
Eye (congenital cataract)	4	2			Bacillus coli		3	2	
Heart		10	1		No organism isolated		3	2

NURSES' RESIDENCE

STUDENT NURSE'S BEDROOM

## Nurses' Training School and Residence

**A**N IMPORTANT and interesting phase of the Hospital work is that of the Training School for Nurses. It is here that these splendid young women are taught the care and cure of the vast army of little children who pass in and out of the portals of this great institution. A very high standard in those who undertake the training is required and rigidly insisted upon. It is the earnest purpose of the School to maintain a standard worthy of the ideals cherished by its founders and commensurate with the opportunities it has to offer. The School was established in the year 1886, and its graduates represent a fine type of woman in all those essentials that go to make up real womanhood, of undoubted integrity and character, devoted to the noble mission in which they are engaged.

A photo is shown here of the Nurses' Residence, as well as one of the Student Nurse's bedrooms. This splendid building was erected in 1905 and presented to the Hospital by the late John Ross Robertson.

It is situated on the Hospital grounds and equipped with lecture, class and demonstrating rooms. Also contains a valuable library appertaining to and covering subjects necessary to the nursing profession. Neither has the health of the student nurse been overlooked in arrangements. Mention may be made of the swimming pool and gymnasium, and the roof with awnings for outdoor recreation and sleeping.

The Library contains 600 Books. A Laboratory for teaching the basic sciences. Also Library of General Literature. Courses are given in Gynaecology and Obstetrics.

The School is non-sectarian. No fees are asked for tuition. The Hospital provides all text books. Uniforms provided by the Hospital after first year.

THE BOARD OF TRUSTEES of the Hospital for Sick Children desires to impress upon the public that, save for certain statutory contributions, the Charity is almost entirely dependent for its existence upon the generosity of the response to its annual Christmas Appeal.

The Hospital has no endowment fund and does not receive any portion of the funds from any joint appeal made on behalf of the Federated Charities of Toronto.

This 45th annual appeal is made with the confident hope that the necessary funds will be forthcoming to enable the Hospital for Sick Children to carry on its wonderful mission of mercy.

Miss F. J. Potts,  
Superintendent

Capt. Burton Holland,  
Sec.-Treasurer
